Title: Sir Cedrics Hotels, NZ, Powered by GuestCentrix

Date: Wednesday, 25 May 2016

The future of leading backpacker hostels operated by Sir Cedrics Accommodation will be powered by systems provided by global hostel software supplier, GuestCentrix.

Sir Cedrics Accommodation has selected the fully cloud based GuestCentrix Hostel.Web for their six hostels and lodges located across New Zealand's South Island.

Being located in some of the world's most stunning locations, each hostel is a destination in itself, where guest satisfaction is paramount and critical. The accommodation company has chosen GuestCentrix Hostel.Web to streamline operations at each property, ensuring hostel staff are able to spend more time managing their guests, instead of managing their computers.

With a great user interface, powerful reporting tools and a vast array of rate and revenue management tools, GuestCentrix Hostel.Web has been designed around the unique needs of the hostel accommodation industry.

Duncan Waterman, Sales Manager for GuestCentrix, Australia & New Zealand, remarks:

"The fully cloud based hostel management system allows for ease of access and also means no expensive servers for Sir Cedrics to manage.

By implementing GuestCentrix Hostel.Web across the hostel group, Sir Cedric's will be able to easily control their rates and reservations and subsequently maximise revenue per guest.

While the new system is simple for Sir Cedrics front desk staff to quickly learn, the real advantages gained by the group will come from the deeper business intelligence provided by the GuestCentrix reporting engine"

Chris Pearce, Sir Cedrics Accommodation Operations Manager explained:

"I was really impressed not only how easy GuestCentrix was to use but also the powerful functionality the software offers will greatly assist in the continued expansion of Sir Cedrics Accommodation.

Sir Cedrics Accommodation prides itself on offering superior customer service and experience and GuestCentrix will better enable us to offer the best customer experience from the moment they book."
